

25 - 27 september ——— 2026

MeritLens

A platform for educators to verify their students understanding of the course work.

The Problem & Current Market

94%

Students use GenAI to help with assessed work.

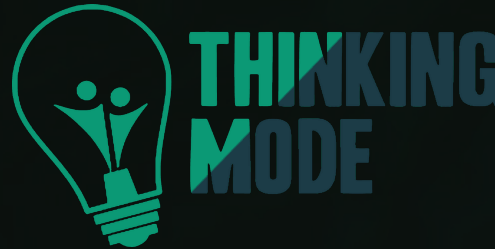

Source: HEPI Student Generative AI Survey 2026

72%

Teachers report at least some difficulty managing student AI use.

Source: College Board, 2026 faculty survey (3,000+ U.S. college faculty).

COMPETITION

KEY DIFFERENTIATOR

- Teacher controlled assessments
- Improved experience for the teachers and students

MeritLens : Teacher's User Journey

ADD QUESTIONS/PROMPT

Start with a good question.

Create an assignment, then shape the conversation with your own questions or AI suggestions.

Assignment title

e.g. Sustainable cities research project

Subject

e.g. Environmental science

Assignment brief

What did you ask your students to explore?

Core concepts optional

Urban planning, carbon emissions, research methods

Separate concepts with commas or new lines. Up to 12.

Cancel Create assignment →

SAVE QUESTIONS/SELECT

What matters most?

Core concepts guide the questions. Keep them focused on the ideas you want students to explain.

Core concepts

Concept 1
Concept 2
Concept 1

Save concepts

 Your approved questions are preferred when they match the student's work. Adaptive follow-ups can be generated during the defence.

REVIEW REPORTS

THE MERIT LENS REPORT

Understanding,
in their own words.

For Teacher Review

27 Sep
5 questions : python_smart_reading_list_solution.pdf

Deep
bkit

Demo evidence - Illustrative only

These status labels use simple scripted rules, not an AI understanding assessment. Review the real transcripts below.

THE OVERALL PICTURE

A starting point for your review.

0 Demonstrated 3 Partial 2 Unclear

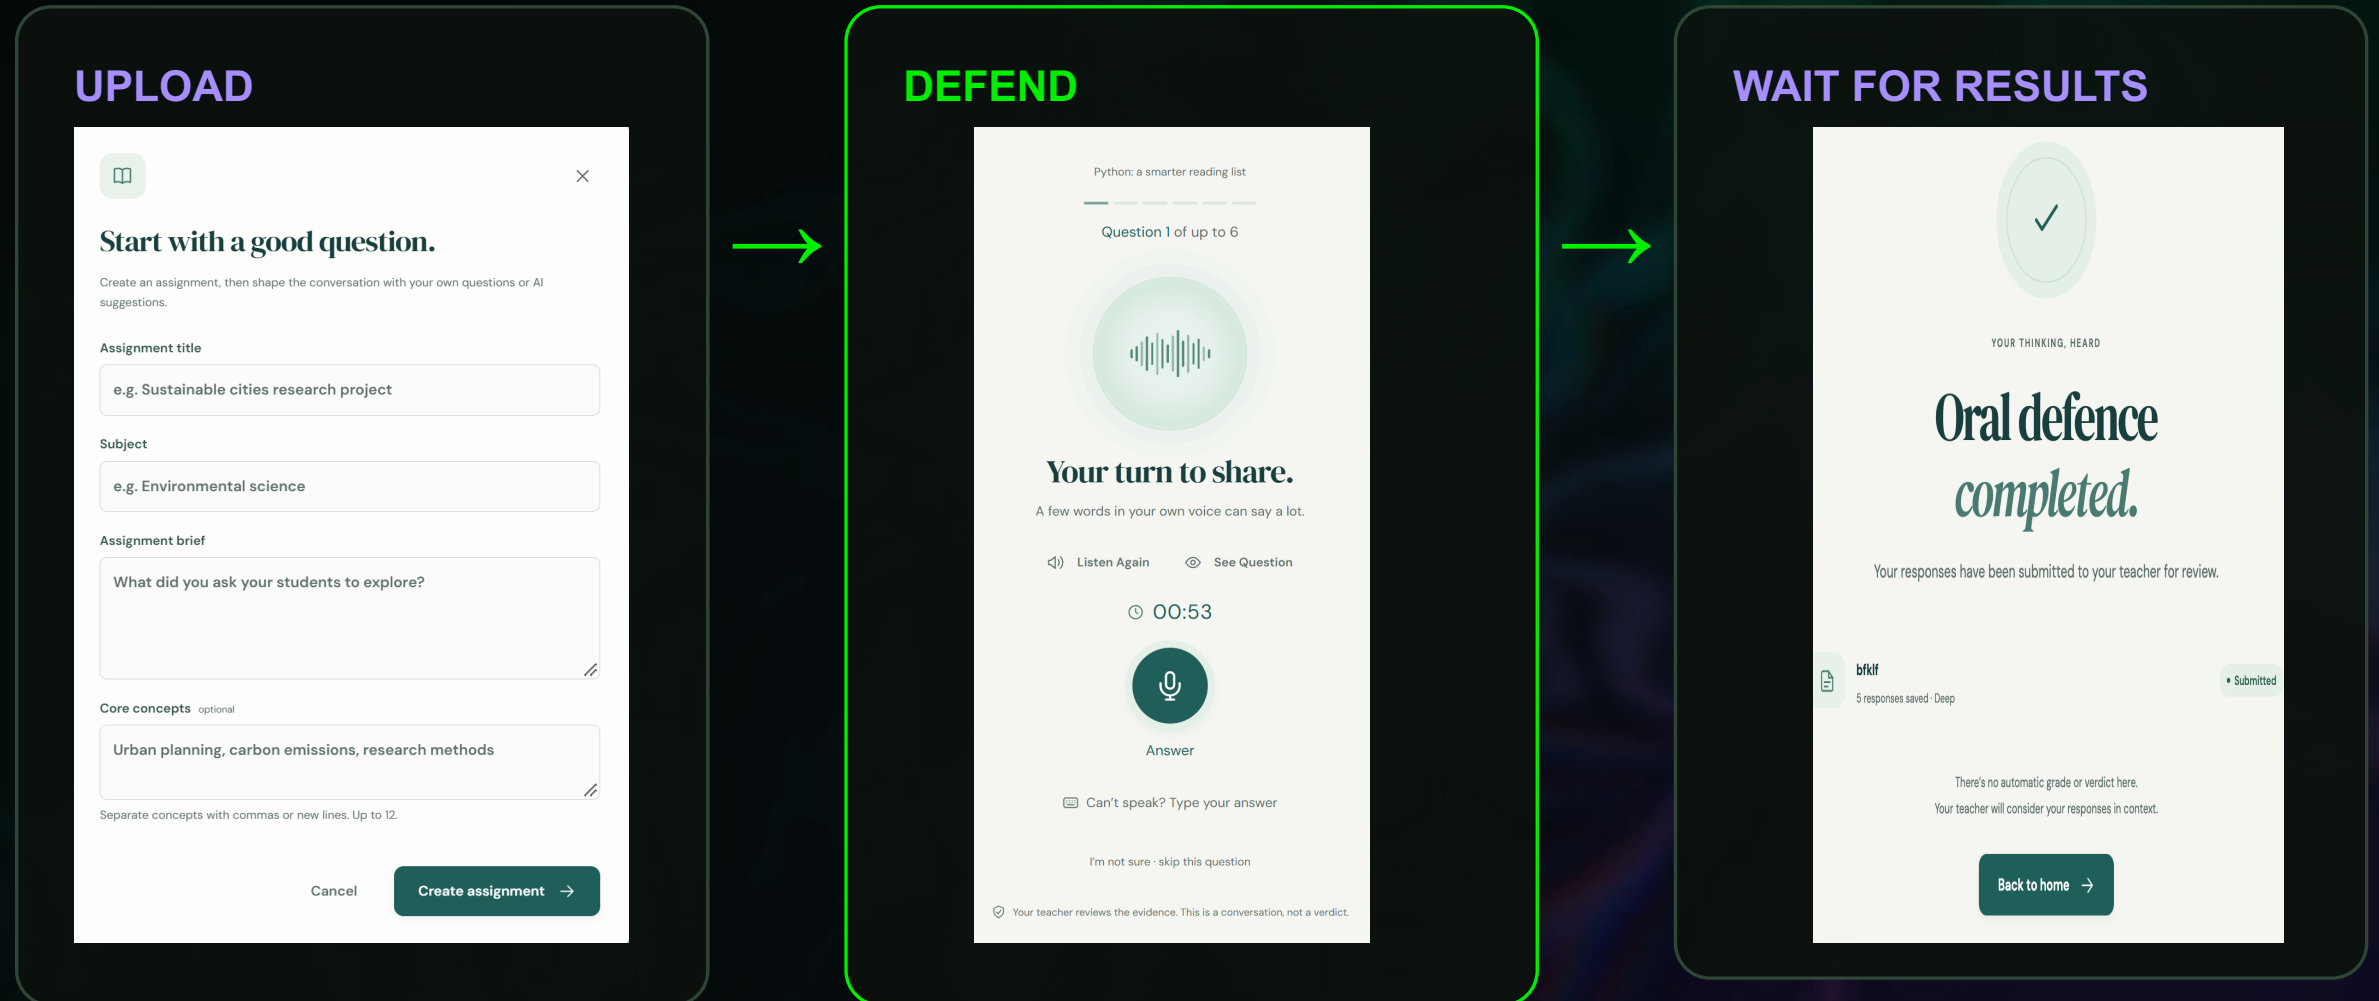

This practice session captured 5 responses. The evidence below illustrates the report format. Demo classifications are simple scripted examples, not an assessment of this student's understanding. A teacher should read the transcripts before drawing conclusions.

Understanding Evidence Matrix

Each observation is grounded in a question and a response. 5 evidence points

Concept	Question	Understanding	Evidence	Response time
Passage 1 Question 1	In your work you wrote, "Python: a smart reading list - Solution Page 1" Can you explain the thinking behind this?	Partial	Demo illustration only: a 11-word response was recorded. This label is not an AI evaluation; the teacher must review the transcript.	17s
Passage 1 Question 2	Could you give a concrete example of passage 1 from your work?	Partial	Demo illustration only: a 15-word response was recorded. This label is not an AI evaluation; the teacher must review the transcript.	19s
Passage 2 Question 3	In your work you wrote, "Python: a smart reading list" Can you explain the thinking behind this?	Unclear	Demo illustration only: a 6-word response was recorded. This label is not an AI evaluation; the teacher must review the transcript.	16s
Passage 2 Question 4	In simple terms, what does passage 2 mean in your assignment?	Partial	Demo illustration only: a 11-word response was recorded. This label is not an AI evaluation; the teacher must review the transcript.	12s

Student's User Journey

YOUR ASSIGNMENT IS READY

A conversation, *at your pace.*

It's obvious. Find a quiet spot and listen to each question. Then
ask the conversation AI to explain your thinking.
